VISION

To be the world-class leader for the integrated development of technical education and training systems catering to the changing needs while achieving the highest level of client satisfaction, quality, professional values and contributing to the technological, economic and social development of the country.

MISSION

NITTTR Bhopal will act as a centre of excellence to:

- Intensify teacher education for improving the quality and performance of technical institutions.
- Make technical education a vibrant learning system for producing competent manpower to steer technological and economic development.
- Provide a wide spectrum of client-driven services and products through various modes.
- Strengthen networking and synergic partnership with technical institutions; industries, field agencies, and premier national and international organizations.
- Promote creativity, innovations, research and development, professional management practices, concept of learning organization, benchmarking and economics of education amongst client systems.
- Enthuse the spirit of professionalism, values and work ethics, networking and partnership with industry and other organizations and technical institutions.

DIRECTOR'S MESSAGE

Established in 1965, NITTTR Bhopal, envisions to be a unique premier institution for comprehensive and holistic development of technical education and training systems. With a mission to be the change agent, over the years, it has fostered the innovations and reforms in the technical education system through training programmes, research & various developmental activities. In the context of National Education Policy 2020, the NITTTR, Bhopal is intensively working to design and implement the proposed NEP goals in the whole country. The institute along with its extension centers in the four states namely, Goa, Maharashtra, Gujarat and Chhattisgarh, has already introduced outcome-based interventions for the technical education system in line with global scenario and conducted need-based training programmes for the teachers of the AICTE approved technical institutions of the country.

"Learning to learn is an essential attribute of a teacher."

-Dr. Chandra Charu Tripathi

The training programmes given in this calendar are mainly based on the training need analysis carried out through Regional Consultative Workshop and other strategies, participant's feedback and recent developmental trends in the country. Thrust has been given as per NEP 2020 provisions on interdisciplinary courses and introduction of new programmes in multidisciplinary areas in collaboration with various national institutions. In tune with 'PM Gati Shakti Master Plan', few training programmes have been included. Some capacity building programmes under G20 have also been kept. As in earlier years, few programmes for teachers of UGC/AICTE approved institutes are also planned under NITTTR Bhopal- Teaching Learning Centre.

Eleven laboratories under NITTTR-Siemens Centre of Excellence (CoE) in "Digitization and Industry 4.0" has been established in the institute. Programmes for UG/PG students such as internship/summer training programmes, inter disciplinary research etc. are planned about which information can be obtained from our Institutes website. Training programmes focused on CoE labs have also been planned this year in the calendar. In addition to the CoE labs, establishment of Centre for Experiencing Learning & Green Energy laboratory is also in the pipeline to provide hands on training to the participants from various Technical Institutions & Universities.

Overall, in the academic year 2023-24, about 300 training programmes, and ten ITEC programmes for international participants are planned. NEP also envisages a minimum 50 hours of Professional Development training Programme(s) to be attended by a faculty member in a year. NITTTR Bhopal also provides tailor-made demand specific chargeable programmes based on mutually agreed proposals.

Apart from the regular calendar programmes, the institute is also offering programmes on Massive Open Online Courses (MOOCs) in the area of technical teacher education, sponsored by MoE, through SWAYAM Platform. All the faculty members of technical institutions are requested to register for these programmes also.

I take this opportunity to solicit cooperation from all the stakeholders of the institute for their active participation to our endeavor of repositioning ourselves successfully in the global arena. Working together as a synergic team, let's contribute with fervor to the cause of quality improvement and ushering a new horizon in technical education system.

My best wishes for an abundance of learning opportunities and joyful experiences ahead.

Director, NITTTR Bhopal
